

DOCUMENT NUMBER LINKING

A new feature in CM/ECF Version 2.2 makes the linking process easier in large cases. This feature decreases the time it takes to bring up documents in a particular category thereby preventing the system from timing out.

Please see the example below and notice the additional fields under the *Category* pick list. The user may enter a document number (i.e. **Documents 10 to 10**) or a document range (i.e. **Documents 100 to 150**).

Note: This feature is optional and you do not have to enter anything. It can be left blank. However, you still must select the category you wish to link back to.
